

Request for the installation of insulated covers on overhead wires

Conductor covers are installed to provide a visual warning and give limited protection against inadvertent contact with energised overhead powerlines.

Work in proximity to powerlines must comply with the **Electricity Reform Act, technical and safety regulations**.

This form must be forwarded to Power and Water Corporation, with an attached map detailing the location 14 working days prior to the date required. Failure to do so may result in delay of installation covers.

Application details

Given name(s) or company/business name

Surname or ABN/ARBN

Phone
